Every second counts.
With payments over the phone, mistakes happen!

Customers type in their own card details into the telephone keypad, while full voice communication is maintained.

A proven track record in not only delivering significant & impressive cost savings, but also increasing contact centre productivity.

We calculate potential savings by using standard everyday contact centre metrics. In many cases, you will recover your total investment in Sycurio in less than 12 months.

Using Sycurio.Voice, customers have reported AHT reductions ranging from 7 – 30 seconds.

---

Reduce your call handling time with Sycurio.

With Sycurio:

Customers type in their own card details into the telephone keypad, while full voice communication is maintained.

Which means:
